Herr Most the Worst in the Lot-What In spector Byrne Thinks of Him. NEW YORK, Nov. 14,-Inspector Byrns considers John Most the most dangerous Anarchist in America. Yesterday he said: "I regard Most as responsible for the Hav market murders in Chicago. He is more to be leared than all the rest. Take the case of Lings, for instance. He was 24 years old. He was born in a province of pears old. He was born in a province of Germany, and some years ago fied to Sweden to escape the consequences of some act. His sympathizers in Sweden became convinced that he was giving the Government information and he was forced out of that country. From there he went to Chicago, and so fell under the spell of Most's influence. He studied Most's book's on the art of making dynamite bombs, and to him is given the credit of manufacturing the bombs thrown at the Haymarket.

Most's teachings made him a fanatic. This same Most, though, is the biggest coward of the whole lot.

WATER FAMINE.

An Alarming Situation in Central Southern Illinois, CHICAGO, Nov. 14.—The probabilities of a water famine in Central and Southern Illinois are becoming alarming. At Springfield, up to and including yesterday, there is a deficiency of 19.16 inches cay, there is a canciency of 19,16 inches of rainfall for the year as compared with the average precipitation for the same portion of the year for the last eight years. Up to July 30 there was a slight excess over the average; so that the deficiency has all occurred singe then. On account of the long drouth preceding the October dryness, the water supply is at a minimum. A United States Deputy Marshal who just returned from Hamilton county, says, he found the farmers there hauling water ten miles for culinary uses. He relates a case in Wayne county where a farmer who is a great breeder of fine and fancy geeze, and has about two hundred of these birds on his farm, has to haul water three miles for them.

The Chicago & Alton road runs daily water trains through Springfield south, and there is scarcely a road in Southern Illinois that is not more or less engaged in the same business, some of them employing all the facilities they can command for that purpose. The city of Litchfield, which has an excellent water supply, is deriving a handsome revenue from the sale of water, at a fixed price per fank, to be delivered to the towns along the roads passing through there. It is evident that unless relief arrives before hard freezing sets in, actual distress will follow. of rainfall for the year as compared with

Jefferson Davis, in his pro-liquor lette

Jefferson Davis, in his pro-liquor letter to Lubbock, of Texas, during their heated amendment campaign, repeated the old asying that "the world is governed too much," which is not now nor ever was true. Had he said the world, especially this country, is legislated too much, he would have been correct. Legislation rampled upon and unenforced breeds contempt for all law, and such legislation rather hinders than helps the cause in whose interest it is enacted. And it was the appreciation of this truth that impelled that able run and beer organ, the Cincinnati Commercial Gazetle, unwittingly to answer the temperance people of Ohio who were urging the submission of the amendment with this significant inquiry: "What will you have when you get the amendment? Will an amendment execute itself?" The whole tenor of Judga Ferguson's article is a complete answer that it won't execute itself, and that neither of the old parties can or will execute it.

Knowing full well, as he must, that if adopted it will be at the mercy of these very treacherous temperance friends in both the old parties, who, the Judge repeatedly declares, care more for party than temperance, and who he makes bold to assert will to a man vote sgainst it if it endangers the election of their party candidates—thus subjecting the amendment to the danger of becoming a by-word and a reproach before a party can be organized.

for its enforcement.

The Judge is a logician. Will he tell your intelligent readers how parties that are too cowardly and corrupt of and within themselves to embody in their platforms and honestly advocate and adopt the amendment can enact and enforce legislation made thereunder? "Do men gather crasses from there. There is little doubt but that Mr. Gladstone's advice will be followed.

Just here permit me to answer what seems to me the weakest and most abeurd of all the learned Judge's charges against the Third party—that the "whisky cellera, saloon keepers and all other supporters of the liquor traffic favor and are helping to organize the Prohibition party."

I will let the liquor dealers answer for themselves as to whom they fear and frantically plead for organization against; and would suggest to the Judge that he and all other good temperance friends join the party they fear most and in which there are no rum sellers, saloon keepers nor any other friends of the liquor traffic. The Innkepers' Journal, a New York liquor organ, says: In every State of the Union these Prohibitionists are showing a united front, and are acting harmoniously against their avowed enemies—the liquor dealers. Powerful and talented men from both parties are entering the ranks of the Prohibitionists, lending both their ability and money to the force which is trying to do away with the liquor trade. Towns, counties and whole States are being captured by the Prohibitionists, There is no use denying the fact. This so-called third party is fast becoming a power which will
